

Ray Products

Facilities and the Capabilities Needed for the Toughest of Jobs!

Ray Products' has been involved in custom heavy gauge thermoforming for over 57 years. We strive to match customer requirements with our proven manufacturing methods to achieve the on time delivery of high quality, tight tolerance parts year after year. As a world class leader in thermoforming, we combine skilled craftsmen, advanced equipment and technology, the latest in 3D CAD / CAM, and a documented process to ensure repeatability and accountability.

We strive to be your single source partner, which is why we offer custom thermoforming, robotic trimming, painting, EMI / RFI Shielding, silk-screening and assembly. We are UL listed as a fabricator of plastic products and work within the ISO compliance guidelines.

Ray Products realizes the importance of a single source partner. We provide complete secondary operations and assembly.
